

VISIONTALLY™

A New Standard in End-Tally Accuracy

VisionTally is the most accurate, labor-free, and efficient end-tally system available, scanning and measuring bundles automatically from both ends at once

- Actual board widths and lengths are measured with laser accuracy
- Wane is automatically detected and included in board widths
- No special bundle preparation or length marks are required
- Tally incoming lumber
- Recover footage lost to human error
- Save labor through automation

Achieve a new level of consistent tally accuracy and recover billable footage!

- Integrates with your existing inventory software
- Search through and retrieve all tallies and bundle images using the included BundleQuery™ database software
- Optionally print out customized bundle tags
- Optionally integrate with a weigh scale
- Scan over 20 bundles per hour with a chain-feed system

VisionTally
has accurately
tallied over
450,000 bundles
totaling over
340 MMBF

The screenshot shows the VisionTally software interface. On the left, there is a 'Tally' section with a table:

Tally	Split Tally	Width Sort	BF
1,511	14"	13"	200
4"	3	2	5
5"	27	8	35
6"	24	5	25
7"	18	1	19
8"	15	3	18
9"	15	2	17
10"	12	1	13
11"	3	1	4
12"	5	5	88
14"	1	1	20
Pieces	123	23	146
BF	1,311	200	

The main area of the software displays a detailed board layout with various dimensions and piece counts. The interface includes a menu bar (File, Home, View, Review), a toolbar with icons for Close, Piece Tally, and Printing, and a status bar at the bottom with options like Clear, Toggle, Sticky, Footage, Fit, Window, Selection, and Dynamic.
